EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
M.Tech., Mathematics & Computing	National Institute of Technology Delhi	8.08 (Upto 1st year)	Aug 2024-2026
B.Tech., Computer Science And Engineering	Azad Institute of Engineering and Technology (AIET) Lucknow / Dr. A. P. J. Abdul Kalam Technical University	7.40	Aug 2024

EXPERIENCE

- Staqo World Pvt Ltd**  Nov 2021 - May 2022
Trainee-PHP Developer DSMNRU Lucknow
 - Built & deployed a full-stack ERP (PHP, Laravel, MySQL, JS, HTML, CSS, Bootstrap, DOM, AJAX, etc.) automating 60%+ administrative tasks, cutting manual work by 40+ hours/week through interactive dashboards.
 - Engineered secure web apps (PHP, Laravel) with role-based access, reducing unauthorized logins by 90% and supporting 1,000+ users. Experience designing schemas, ER diagrams, and writing optimized SQL queries with stored procedures.
 - Debugging, testing, and best practices — fostering teamwork and continuous learning. Applied TDD for backend modules (PHP, Laravel), improving defect detection by 30%, enhancing software reliability.

PROJECTS

- AI-Powered Image & Content Generation Platform** Sep 1 - 28, 2025  
Tools: Node.js, Express, React, Vite, TailwindCSS, Clerk (Auth), Cloudinary, Multer, NeonDB (Postgres), OpenAI API, Google Gemini API, ClipDrop API, Axios, React Hot Toast, Lucide-React, ESLint, Vercel, Git
 - Developed a full-stack AI platform enabling article/blog generation, AI-assisted images, and advanced editing (background removal & object erasure) using Cloudinary transformations + ClipDrop API.
 - Integrated OpenAI & Google Gemini APIs to improve text generation, blog suggestions, and contextual content creation, boosting response quality by 30%.
 - Built a modern React + Vite frontend with TailwindCSS, real-time feedback, and secure authentication (Clerk), restricting premium features to paid users.
 - Deployed a scalable serverless backend (Express, Multer, NeonDB, Vercel) with CI/CD integration, reducing processing time by 40% and ensuring production-grade reliability.
- Project Fake News Prediction System:** 
Tools: Python, Machine Learning, Scikit-learn, Pandas, NumPy, TF-IDF, NLP, Matplotlib, Seaborn, Git
 - Engineered a fake news prediction system to classify news articles as real or fake using supervised learning techniques, achieving 98.63% train and 97.91% test accuracy through precise modeling and data analysis.
 - Implemented TF-IDF & tokenization, improving feature extraction efficiency by 20%, contributing to 98.6% training & 97.9% testing accuracy.
 - Developed a robust ML pipeline (logistic regression, random forest), reducing false positives in fake news detection by 40%.
 - Evaluated models using precision, recall F1, optimizing thresholds to enhance F1-score by 15% on labeled datasets.
- Project Sentiment Analysis on IMDB Reviews with LSTM:** 
Tools: Python, Deep Learning, TensorFlow, Keras, NLP, Word Embeddings, Git
 - Designed an LSTM model (TensorFlow) achieving 87.6% accuracy on 50k IMDB reviews, improving sentiment classification speed by 20%.
 - Optimized input pipelines with tokenization & embeddings, reducing preprocessing time by 25%.
 - Fine-tuned model with precision & recall metrics, enhancing overall sentiment classification F1-score by 18%.

RESEARCH PROJECTS AND PUBLICATIONS

- National Institute of Technology, Delhi** Research under Dr. Prashant Kumar
Cyclone-Induced Rainfall Extremes Using GEV Analysis Along Cyclone Fani's Track Jan 2025 - Present
 - Modeled extreme rainfall using Generalized Extreme Value (GEV) distributions across cyclone-hit regions, quantifying 100-year return levels for improved disaster planning.
 - Analyzed spatial patterns and rarity of precipitation during Cyclone Fani using satellite and IBTrACS data, identifying zones 80% more prone to future extreme events.
 - Collaborated with faculty and peers on large-scale meteorological data analysis and machine learning projects requiring clear communication and project ownership.

TECHNICAL SKILLS

- **Languages**:Python, C, Java, SQL, JavaScript.
- **Web Development**:PHP, HTML, CSS, Laravel, Bootstrap, React, Node, Expres, JS, AJAX.
- **Artificial Intelligence/Machine Learning**:TensorFlow, PyTorch, Scikit-Learn, Keras, Pandas, NumPy, NLP, CNN, RNN, Time Series.
- **DataBase**: MySQL, SQL.
- **Tools**: Git, Streamlit, Jupyter, Pycharm, Google Colab, Android Studio.

CERTIFICATIONS

- **Softpro India Computer Technologies Private Limited**, [Machine Learning](#) June 2024

ACHIEVEMENTS

- Qualified GATE 2024 (CS) in top 15%, demonstrating advanced data structures & algorithm expertise.
- Solved 250+ Leetcode , strengthening algorithmic thinking & optimizing data structure usage.
- Secured 2nd rank in M.Tech (Mathematics & Computing), NIT Delhi – 1st Year (2024–25).

EXTRA-CURRICULAR ACTIVITIES

- **National Institute of Technology, Delhi** Aug 2024 – Aug 2026
Teaching Assistant
 - Conducted B.Tech ML labs for 60+ students, clarifying ML & Python concepts, improving pass rates by 15%, and handling academic issues with strong communication & empathy.
