OBJECTIVE

Passionate about Artificial Intelligence and Data-Driven Systems, I seek to apply my skills in deep learning, data analysis, and software engineering to develop intelligent and efficient solutions.

EDUCATION

Master of Technology, National Institute of Technology, Delhi 2025 – 2027
Delhi, India

Major in Mathematics and Computing

Bachelor of Technology, Bikaner Technical University, Bikaner 2021 – 2025
Rajasthan, India

CGPA: 7.66/10

Major in Computer Science and Engineering

SKILLS

Programming Languages: Python, Java, SQL

Machine Learning & AI: Deep Learning, Computer Vision, OpenCV, TensorFlow, PyTorch, HuggingFace, Keras, NumPy, Pandas, Scikit-learn

Web Development: HTML, CSS, JavaScript, React.js, Flask

Data Science & Tools: Data Preprocessing, Model Evaluation, Data Visualization, Jupyter Notebook, Matplotlib, Seaborn

Databases & Developer Tools: MySQL, SQLite, Git, GitHub, Docker, Linux CLI, VS Code, Ubuntu

EXPERIENCE

Research Intern Aug 2023 - Jan 2024
Orbitx India Aerospace Jaipur, Rajasthan, India

- Applied deep learning-based optimization techniques in MATLAB and Python to enhance aerobraking control systems, resulting in 20% improved stability
- Led the Aerobraking team for the Reusable Launch Vehicle project, "Atal-Yaan".
- Conducted research that significantly supported the successful landing of the Reusable Launch Vehicle through optimized Aerobraking techniques.

PROJECTS

Blood Group Detection Using Fingerprint April 2025 - May 2025

- Developed a deep learning system using a ResNet-50 model to predict human blood groups from fingerprint images, achieving 85% accuracy with real-time results via a Flask web app.
- Trained the model on a curated fingerprint dataset with techniques like dropout, early stopping, and augmentation to reduce overfitting and improve generalization.

Automatic Number Plate Detection System Nov 2024 - Jan 2025

- Developed a Python-based system for automatic number plate detection.
- Using OpenCV for detection and OCR (Easy Ocr) for number extraction.

ACTIVITIES AND COURSEWORK

Workshops & Certifications: Attended workshops on NLP Fundamentals, Medical Imaging & AI Applications, and Reinforcement Learning.

Hackathons & Competitions: Led a 4-member team in *Eureka! 2024* — Asia's largest business model competition by IIT Bombay; selected in the Top 500 out of 25,000+ entries nationwide.

Research & Development: Completed *Prompt Engineering & Programming with OpenAI* from Columbia University, focusing on building AI systems using OpenAI API, LangChain, and LlamaIndex.

Cloud Computing: Completed *Cloud Computing Fundamentals* course by IBM, covering cloud architecture, deployment models, and virtualization.
