PROFESSIONAL SUMMARY

I am a dedicated applied researcher specializing in assessing the economic impacts of climate extremes and variability, with a primary focus on the Indian economy. My expertise lies in analyzing how temperature and rainfall extremes, along with large-scale climate drivers such as ENSO and the Indian Ocean Dipole (IOD), influence sectoral and regional economic performance. I utilize climate indices (ETCCDI) and high-resolution datasets to quantify the sensitivity of GDP—particularly agricultural and industrial outputs—to climate variability and extreme events. By integrating climatological and economic modeling approaches, my research aims to identify the spatial and temporal patterns of climate-induced economic risks, contributing to the development of climate-resilient economic strategies and sustainable policy frameworks. I have experience working with observational climate records, reanalysis data, and economic indicators, and I am passionate about advancing interdisciplinary research at the intersection of climate science and economic development.

EDUCATIONAL QUALIFICATIONS

Course/Examination	Discipline/ Specialization	Institution / University	Year of Passing	Percent
Doctor of Philosophy	Mathematics	National Institute of Technology Delhi	Ongoing	--
Master of Science	Mathematics	Kurukshetra University, Kurukshetra	2019	78.2%
Bachelor of Education	Mathematics & Physical Science	Kurukshetra University, Kurukshetra	2022	72.8%
Bachelor of Science	Non-Medical	Kurukshetra University, Kurukshetra	2017	74.52%
Intermediate	Non-Medical	HBSE Board	2014	81 %
High School	--	HBSE Board	2012	95.2 %

ACHIEVEMENTS & AWARDS

- Qualified JAM (2017)
- Awarded **Junior Research Fellowship (JRF)**, from UGC (2022)
- Qualified GATE (2023)
- Qualified NBHM (2023) (Written exam)

DETAILS OF Ph.D. WORK

Thesis Title:	Economic Impacts of Climate Extremes
----------------------	--------------------------------------

Supervisor Name and Affiliation:	Dr. Prashant Kumar, Associate Professor, NIT Delhi, India
Brief Description of Ph.D. Work:	My Ph.D. research, titled " Economic Impacts of Climate Extremes and Variability over India ", examines how temperature and rainfall extremes affect India's economic performance. Using ETCCDI indices and climate drivers such as ENSO and the Indian Ocean Dipole (IOD), I analyze sectoral and regional impacts on GDP, particularly in agriculture and industry. The study aims to quantify climate-economic linkages and support strategies for climate-resilient and sustainable development.

EMPLOYMENT HISTORY

S. No.	Name of the Post	Institution/University	Period (Year)	Brief description of work
1.	Senior Research Fellow	NIT Delhi	(01-08-2025 to ongoing)	Economic Impacts of Climate Extremes
2.	Junior Research Fellow	NIT Delhi	2 Years (01-08-2023 to 31-07-2025)	Economic Impacts of Climate Extremes

TECHNICAL SKILLS

- **Software's** - MATLAB, Origin, Latex, MS Word, PowerPoint, Excel, Grads, CDO, ArcGIS.
- **Languages** - MATLAB, Python, C/C++, Fortran, Python.
- **Soft Skills** - Teamwork, Leadership, Event Management, Written & Oral Communication.

PROFESSIONAL ACTIVITIES

PUBLICATIONS

Journal Articles:
