Education

Doctor of Philosophy (PhD)- Mathematics

Currently Pursuing
National Institute of Technology Delhi

Master of Science (M.Sc.) - Mathematics

2022 - 2024
Babasaheb Bhimrao Ambedkar University Lucknow
CGPA: 8.2/10

Bachelor of Science (B.Sc. Hons.) - Mathematics

2018 - 2021
University of Delhi
CGPA: 9.08/10

Scholarships

Bachelors

DST Inspire Scholarship
2018-2021

Masters

DST Inspire Scholarship
2022-2024

Internships

Summer Research Internship (CST-UP)
IIT Kanpur
2023

Projects

Mathematical Modeling of the effect of rarity value and predator harvesting on predator-prey dynamics with strong Allee effect in prey species

- The dynamics of predator and prey species interactions is influenced by harvesting practices applied to these populations. Moreover if consumers are willing to pay more value for the rare species, it can further fuel its exploitation.
- In this study, we have formulated a mathematical model to study the impact of rarity value on the dynamics of predator-prey system where prey population exhibits strong Allee effect and predator population is subjected to variable harvesting.
