WORK EXPERIENCE

Data Engineer, Intel

05/2022 – 08/2024

Bengaluru, India

- Developed and maintained scalable data pipelines using **Azure Data Factory** and **Azure Databricks** to support enterprise reporting needs.
- Integrated data from **SQL Server**, **Teradata**, and **Enterprise Data Warehouse (EDW)** into **Snowflake**, ensuring consistency across large-scale datasets.
- Automated data transformation workflows using **Python** and **SQL**, significantly reducing manual effort and improving reliability.
- Worked with metadata-driven frameworks to ensure flexible pipeline configuration and lineage tracking.
- Optimized queries and processing logic for handling **millions of records**, improving performance and reducing latency in reporting outputs.

EDUCATION

Bachelor of engineering, DSATM

Bengaluru, India

CGPA - 8.24

Mtech, NIT Delhi

08/2024 – present

New Delhi, India

SKILLS

SQL • Azure data factory • Azure data bricks • snowflake • Python • C • Azure devops

PROJECTS

Intel Analytics, Data transformation(Backend)

- Extract data from source using metadata and azure data factory
- build spark clusters
- Create azure pipelines
- Transformation using SQL
- Load it into snowflake

GPU Workload Classification using ML, self interest

Build an ML model that classifies GPU workloads (e.g., gaming, rendering, compute, idle) based on hardware metrics like memory usage, compute units, thread occupancy, etc.

DECLARATION

I hereby declare that the details and information given above are complete and true to the best of my knowledge
