OBJECTIVE

I am pursuing M.Tech in Mathematics and Computing and have a strong interest in Machine Learning, Artificial Intelligence, Data Analytics, and Data Engineering. With a foundation in mathematics, programming, and analytical problem-solving, I am developing skills in data analysis, machine learning, and data-driven problem solving. I am interested in applying mathematical and computational techniques to real-world datasets, building predictive models, extracting meaningful insights, and developing efficient data solutions. I am currently focused on strengthening my technical expertise through hands-on projects and practical applications.

TECHNICAL SKILLS

- Programming : C/C++, Python
- Core Concepts : DSA, OOP, DBMS
- Web Technologies : HTML, CSS, Django
- Framework : Matplotlib, NumPy, Pandas

PROJECT

Location Based Services Application with Privacy-Preserving Machine Learning

I develop a Location-Based Services application using Python and machine learning techniques including federated learning, to utilize geographical data for information, entertainment, and security within Geographic Information Systems (GIS). Implemented a privacy protection mechanism (EDEN LPPM) using the federated learning in a distributed system to enhance data privacy and Enabled users to apply various LPPMs (e.g., Promesse, Geo-indistinguishability) and conduct re-identification attacks (POI-Attack, PIT-attack) on mobility datasets. Enhanced understanding of location privacy challenges and contributed to secure location-based services.

Dictionary Web Application

Developed a dynamic web application that fetches and displays multiple definitions, example usages, and part-of speech classifications for any given word using a public dictionary API. Integrated audio pronunciation functionality (when available) for auditory learning and enhanced user engagement. Designed a clean, responsive user interface with intuitive navigation for seamless user experience across devices

EDUCATION

B.Tech. in Computer Science and Engineering — **8.1GPA**
Rajkiya Engineering College, Sonbhadra — 2020-2024

Higher Secondary Education — **90.2%**
Jawahar Navodaya Vidyalaya Sitapur — 2018-2019

SOFT SKILLS

- Problem-Solving
- Team Colaboration
- Adaptability
